PROFILE

A modern technologist with a degree in engineering and telecommunications and more than 4 years of experience in the IT sector. As a IT security auditor, I have managed and delivered IT audits across different compliance and technical areas. As previously being a system administrator, I have good technical knowledge in system administration, change management, user access management and testing. Nevertheless, I have big passion for programming and automation of processes. During my work at Deloitte, I have successfully implemented scripts for automatic data collection. Following my career, I have performed work over client's data, analysing it and conducting different tests. Apart from Deloitte, I have built several web sites on Wordpress and custom based HTML and CSS. Fully implemented SCADA system as automation solution.Strong will to program, develop and produce new products that help society.

EXPERIENCE

IT Security Consultant / IT Auditor

Deloitte Touche Tohmatsu Services, INC

September 2016 – February 2019 Sofia, Bulgaria

- Managed IT security audit of companies from the banking and financial sectors.
- Conducted sufficient tests and developed different audit approaches in order to evaluate IT and application controls depending on the client.
- Performed reviews of key business processes implemented by big organizations such as banks, telecoms and energy companies.
- Executed General IT Control tests (GITC) as well as Application control test
- Successfully implemented Automated Scripts in the IT Audit process, reducing the time for the collection of information by 70%.
- Produced IT audit report for each client, confirming that the audit comments are clear, understandable and focused on the primary problem
